All Balconies

Dear Residents

It has been brought to our attention that despite previous notices advising to not use balconies during working hours, several cases have been reported that this has not been adhered too.

We have therefore been advised by Network Homes to **seal off all balcony doors** in the coming weeks if not already done so. This is more important now than ever as Higgins must maintain a safe working environment for their staff and subcontractors.

Additional signage and fencing may be used to prevent access to balconies to increase residents' safety which is a key concern for the cladding contractor.

As always we are very grateful for residents ongoing understanding, cooperation and support and we understand the frustration that you must be feeling and you can be assure that everyone is doing their best to keep this project moving the right direction.

IMPORTANT PLEASE READ

We will be blocking off balconies if not already done so for your own safety as it is currently unsafe to use.

Please accept our sincere apologies for any inconvenience caused by this.

Higgins Partnerships on behalf of Network Homes
